

LAYO OPERATIONS — STANDARD OPERATING PROCEDURE (SOP)

Location: India Hub Workstation (/ops) | Version: 1.0 | Effective: September 2026

1. Workstation Setup & Login

- **Login:** Navigate to /ops on the workstation browser.
- **Peripherals:** Connect barcode scanner, digital scale, and webcam/mobile camera.
- **Hub Selection:** Select active hub location (**Delhi NCR Hub** or **Mumbai Hub**).

2. Direct Shipment Operational Workflow ('■ Ship Immediately')

Step 1: Inward Receipt & Ingestion

Trigger: Domestic merchant parcel (Myntra, Amazon, Ajio, Flipkart) arrives at hub doorstep.

Action: Locate customer Locker ID (e.g., #LYS-1799) or search merchant order ID. Click '**Confirm Package Received at India Hub**'.

Result: Status updates to **inwarded**.

Step 2: Unboxing, QC & Photo Verification

Trigger: Package inwarded.

Action: Open merchant box, inspect physical items against declared checklist on screen. Take 1-2 clear unboxing photos.

- If items match: Click '**Confirm Items Matched & Pass QC**'.
- If damaged/missing: Click '**Flag Discrepancy**', attach photo & details.

Result: Status updates to **qc_verified**.

Step 3: Layo Green Box Repack & Digital Scale Weighing

Trigger: Passed QC.

Action: Strip merchant cardboard & plastic bubble fillers. Pack items in Layo Green Box (S/M/L/XL). Place box on scale, enter gross weight (kg), click '**Complete Repack & Weigh**'.

Result: Status updates to **repacked**. System deducts 20% advance and issues 80% balance invoice to customer.

Step 4: Master Air Cargo Consolidation & Flight Dispatch

Trigger: Customer pays 80% balance / Daily flight dispatch cutoff.

Action: Assign Green Box to Master Air Cargo Box (e.g. MASTER-DEL-104), enter Canadian AWB, and click '**Assign to Master Air Cargo Box**'.

Result: Package dispatched on air cargo to Canada (**in_transit**).

3. Hold & Combine Operational Workflow ('■ Hold & Combine')

Step 1: Accessing the Hold Queue

Navigate to the amber '■ Hold & Combine Queue' tab at top of `/ops` workstation. View active Hold Group cards.

Step 2: Individual Package Receipt ('Mark Arrived')

Action: As each individual parcel arrives, locate the item in the customer's Hold Group card (e.g. Package 1 of 2) and click 'Mark Arrived'.

Result: Status updates to **hold_arrived** (Progress: 1 of 2 arrived).

Step 3: Group Consolidation ('Combine & Dispatch')

Trigger: All expected packages arrive (2 of 2 arrived).

Action: Click the unlocked green 'Combine & Dispatch' button at top of Hold Group Card.

Result: System assigns group Master Box ID (e.g. HOLD-K8X91A), merges items into 1 shipment, and moves directly to QC & Repack.

Step 4: Master Repack & Single 80% Billing

Strip all merchant boxes, repack all group items together into 1 Layo Green Box, weigh on scale, and complete repack. System subtracts all 20% advances and issues single 80% invoice.

4. Operational Quick Reference Matrix

Stage	Trigger / When	Action in `/ops`	Status
Inward Receipt	Parcel arrives at hub	Click 'Confirm Package Received'	inwarded
QC Verification	Merchant box opened	Upload photos & click 'Confirm Items Matched'	qc_verified
Hold Arrival	Individual package arrives	Click 'Mark Arrived' in Hold Card	hold_arrived
Hold Combine	All group packages arrived	Click 'Combine & Dispatch'	qc_verified
Repack & Weigh	Packed in Layo Green Box	Enter scale weight & click 'Complete Repack'	repacked
Air Dispatch	80% balance paid	Assign Master Box ID & Canadian AWB	in_transit

5. Warehouse Golden Rules

1. ZERO Merchant Packaging: Never ship merchant cardboard boxes or plastic fillers internationally. Always repack into official Layo Green Boxes.

2. Locker ID Verification: Always verify the customer Locker ID (e.g. #LYS-1799) on incoming courier labels before inwardsing.

3. Immediate Discrepancy Flagging: If items are missing, wrong, or damaged, click 'Flag Discrepancy' with clear photos BEFORE repacking.
